

# A World of Difference.

## *Kirby Preassembled Door Systems for Metal Buildings.*

The Kirby preassembled door system is completely assembled including all hardware components and subframe system (framed opening). This means the installer is no longer faced with the common problems often associated with the installation of walk doors such as damaged or lost parts, quality of components, difficult hardware installation, and lengthy installation time. Kirby doors are designed with top quality components and are assembled in a factory-controlled environment. You always get the right door for the right job, ready for immediate installation.

- *Painted finish coat*
- *Installation time in less than 30 minutes*
- *Custom-made doors to exact job specifications*
- *No cutting, welding, or painting at the job site*
- *Extended warranties on hardware components*
- *Unparalleled customer service*
- *National distribution capabilities*
- *Full range of options and accessories*

# The Kirby Difference

Kirby Building Systems is committed to excellence in the products and services we offer. Each door and frame component has been carefully selected and designed to meet our high standards of quality.

## Important Elements of Our Door System

- 16-gauge reinforcement channel around the perimeter of the door leaf
- 12-gauge frame header-to-jamb connection plate for added strength
- All galvanealed door & frame metal components
- Heavier lock and closer reinforcements
- Latch guards - standard Kirby door component

## Door Options and Hardware Accessories

Kirby understands the importance of offering options and choices to builders in an ever changing and demanding market.

- Door sizes: single (3070, 4070) and double (6070)
- Colors: White and bronze
- Locksets - Cylindrical and Mortise
- Kick-plates, and crash chains
- Door lite kits with glass options
- Ball-bearing hinges with NRP
- Exit devices with lever trim
- Door closers
